

How it works

The **XL-BOARD** is a stationary, foldable and retractable vehicle transfer board designed to bridge the gap when transferring from a wheelchair to a driver or front passenger seat.

Features

- Assists transfer into the vehicle
- Easy to use
- Takes up very little space
- Retractable support arm

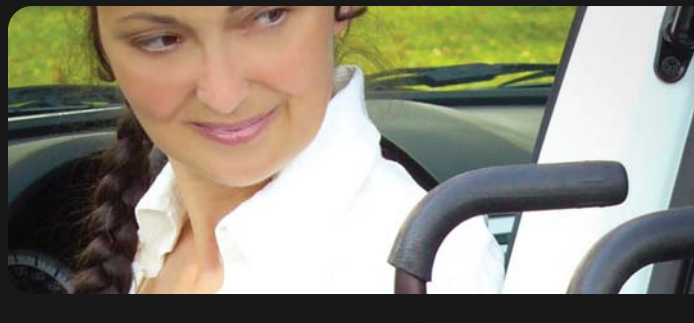

Specifications

- Maximum capacity: 300 lbs
- Transfer board dimensions: 14.5" × 13"
- Transfer board height: 21.5" from the ground
- Mazda 5 seat height: 23" from the ground

Installation

No structural modification to the vehicle means a quick and easy installation. The **XL-BOARD** installs directly into the seat's original floor bolts. It is also easily removed to return the vehicle to its original condition without affecting the resale value.

XL-BOARD

Vehicle transfer board designed for Mazda 5

The **XL-BOARD** is designed to fit into the Mazda 5 because it is the only vehicle of its kind to offer a sliding door. This makes it an ideal vehicle for wheelchair users.

The **XL-BOARD's** neat and compact design makes a great solution for people looking for an alternative to a minivan.

Join forces

Combining the **XL-BOARD** along with the **SPEEDYLIFT** may be the solution to simplify your vehicle access.

Although a compact vehicle, the Mazda 5 offers a 28 inch sliding door opening. Great for a manual wheelchair! It is important to note that a power sliding door is not available from Mazda or Adapt Solutions.

Mazda and Mazda 5 are registered trademarks of Mazda Motor Corporation

Due to the diversity of mobility solutions available to you, please contact your local mobility dealer for a personalized evaluation and overview of options tailored to your needs.

Our products qualify as adaptive equipment and are eligible for reimbursement under the terms of Mobility programs offered by various vehicle manufacturers.

Safety

We take our customers' safety seriously. We are dedicated to manufacturing quality mobility equipment. Our products undergo a strict certification process. Certification of our products involves different tests such as: crash testing, cycle testing and weight capacity testing. We are proud to offer a line of products that exceed the industry's standards.
